Bengaluru's Peenya Elevated Flyover to Remain Closed for Four Days

Bengaluru

The Peenya Elevated Flyover in Bengaluru will be closed for 4 days (April 13–17, 5 AM–11 AM) for load testing. Authorities are conducting tests to ensure structural safety following recent repairs. Affected stretch includes Kennametal Widia to SRS Junction and CMTI to Parle-G Toll on Tumakuru Road. All commuters, including commercial and logistics vehicles, will face diversions and congestion. Likely traffic delays and supply chain disruptions in industrial areas like Peenya. Adopt flexible scheduling, alternate routing, and limited remote operations to reduce disruption

Noida-Ghaziabad Traffic Snarls Intensify Amid Construction Push

NCR

Traffic restrictions have been imposed across Noida-Ghaziabad due to ongoing road and metro construction, impacting key stretches such as City Centre-Sector 62 and Model Town corridors. Certain service roads and routes towards Electronic City are closed or diverted, likely causing congestion. Businesses should plan logistics in advance and allow buffer time, while commuters are advised to use alternate routes, avoid peak hours, and follow traffic advisories.

Road Work Leaves Pune Residents Struggling with Dust

Pune

A major National Highways Authority of India road widening project in Phursungi, Pune has led to severe dust pollution, with dug-up roads and construction debris creating hazardous conditions for commuters and residents. The situation may impact employee health, outdoor work, and commute efficiency, potentially affecting productivity and operations in nearby areas. Companies should monitor local conditions, promote remote or flexible work, and implement health safety measures to minimize exposure and ensure continuity.

Water Management Measures Underway Amid Rising Demand

Pune

Authorities in Pune are closely monitoring dam levels and planning water management measures to ensure supply sustainability amid rising summer demand, though no immediate citywide water cuts have been confirmed. The situation may lead to localized supply pressure or future restrictions, potentially affecting business operations and facility management. Companies should adopt water conservation measures and plan contingency arrangements to ensure continuity.
