IMD Flags Unseasonal Rain Sweep in Maharashtra till April 4

Mumbai

IMD has warned of unseasonal rain across Maharashtra over the next few days through early April, with the highest intensity expected along the Mumbai-Pune corridor. Pune, Lonavala, and Karjat may see heavy showers and thunderstorms, while Mumbai could experience patchy rain. Businesses should secure inventory, safeguard infrastructure, review contingency plans, and ensure power backups. Commuters are advised to plan buffers, avoid waterlogged routes, monitor real-time updates, and prioritise safety amid possible sudden disruptions.

Northwest Weather Activity Signals Continued Disruptions

NCR

Delhi-NCR is witnessing cloudy skies, rain, gusty winds, and reduced visibility due to active western disturbances, with IMD indicating the wet spell will persist across northwest India and peak around April 3-4, alongside hailstorms in nearby states ; as such unstable weather is expected to continue over the next few days, intermittent disruptions to road, rail, and air movement are likely, so both the public and organisations should plan flexible travel, account for delays, and adjust outdoor and logistics activities to maintain safety and continuity.

Amritsar Airport Curbs Set to Disrupt Flight Schedules

Flight operations at Amritsar Airport will face daily disruption from April 1 to September 27, with the runway shut for around 8 hours (1:45 pm–9:45 pm) due to upgrade work, leading to rescheduled arrivals and departures outside this window ; as prolonged daily closures continue, travellers and organisations should expect recurring timing changes, tighter flight availability, and potential spillover congestion at nearby airports, making it important to check schedules in advance, allow buffer time, and plan flexible travel and logistics to avoid disruptions.

Narrow Roads and Unregulated Parking Trigger Gridlock in Gopalapuram

Chennai

The situation in Gopalapuram, Chennai highlights ongoing traffic and parking issues affecting mobility and safety. Unregulated parking, wrong-side driving, and narrow roads especially near schools cause heavy congestion, often reducing roads to single lanes. During peak hours, this leads to gridlocks and unsafe conditions for pedestrians. Weak enforcement and pavement expansion further limit road space, resulting in delays, restricted emergency access, and operational inefficiencies, impacting business continuity nearby. Plan alternate routes and buffer travel time for staff and deliveries

New Waste Rules Signal Strict Compliance Shift

India's Solid Waste Management Rules 2026 will take effect from April 1, mandating four-way waste segregation, digital tracking of waste movement, and stricter accountability for bulk generators with penalties for non-compliance; as enforcement tightens nationwide, households and organisations may face stricter checks, fines, and operational changes in waste handling, making it important to adopt proper segregation, align disposal practices early, and prepare for increased monitoring to avoid disruptions and compliance risks.
