LPG Crisis Disrupts Workforce and Business Continuity in India

Rising LPG prices and shortages are forcing migrant workers to leave cities, leading to labour shortages, reduced production, operational disruptions in SMEs/restaurants, and increased costs, ultimately affecting supply chains and service delivery. Adopt alternative fuels (PNG/electric), support workforce retention, maintain buffer stock, diversify suppliers, and ensure flexible operations to sustain continuity.

Earthquake Tremors Shake Delhi-NCR; Authorities Urge Caution Over Possible Aftershocks

Strong earthquake tremors were felt across Delhi-NCR and parts of north India late Friday after a 5.8-magnitude quake struck Afghanistan's Hindu Kush region. Residents reported brief shaking, though no major damage or casualties were immediately reported in India. Authorities are monitoring the situation amid concerns of aftershocks, as the region remains seismically active. Businesses should review safety protocols, while commuters are advised to remain alert and follow official updates.

IMD Upgrades Delhi-NCR Alert from Yellow to Orange as Severe Storm Threat Escalates

Delhi-NCR's weather has escalated sharply a day after a yellow alert, with the IMD now issuing an orange alert for heavy rain, thunderstorms, lightning, and gusty winds, over the next five days. The sudden shift follows recent dust storms and strong winds, with forecasts warning of possible hail, waterlogging, and traffic disruptions across the region. Authorities are on alert as conditions may impact daily life and infrastructure.

Stability Returns Despite Continuing Disruptions

The movement of LPG tankers through the Hormuz route shows some improvement, but many ships are still waiting, so supply remains uncertain. This can lead to fuel shortages, rising costs, and disruptions for businesses like restaurants, small industries, and manufacturing units that depend on LPG. Businesses should keep extra fuel, explore alternative energy sources, and stay flexible in operations. Planning ahead with multiple suppliers and backup options can help reduce the impact of ongoing delays.
